

Introducing The New

slim mo dolly

Item #8803

Encourage recycling and increase efficiency in collection and transportation of waste and recyclables with Delamo's Slim Mo Dolly. Each dolly links securely together to create a recycle/waste station and effectively move multiple cans in one trip as a trolley. It can also be used separately as a dolly for the Slim Mo Waste Can.

- For use with Delamo's 23-gallon Slim Mo waste cans and most competitors' 16 and 23-gallon cans.
- Built-in sleeve prevents tipping by securing the container in place.
- Each dolly includes a rear locking caster to enable the creation of a mobile recycling/waste station and promote ease in collection.
- Saves time by reducing collection trips and reduces strain from heavy loads.
- Narrow size is perfect for restaurants, schools, airports, building maintenance and more.

Dolly Linking

- Dollies quickly attach to each other by linking the rear hook of the left dolly into the rear groove of the right dolly and guiding them together.
- Dollies detach by pressing down on the front red foot pedal and pulling to the right. They detach, sequentially from right to left.
